Blast of cooling and soothing ingredients for massage

- Provides optimal glide for prolonged massage activity
- Offers cooling menthol, eucalyptus, and camphor bark oils to create an invigorating sensory experience
- Features a light and refreshing gel formula that's paraben-free

## What Is enummi® Spa Cooling Massage Gel?

enummi Spa Cooling Massage Gel features a blast of cooling and soothing eucalyptus, peppermint, and camphor bark oils to provide a calming and enlivening massage experience.

## Key Features

- Provides a silky feel with powerful performance
- Includes an effective blend of essential oils known for their soothing effects

## Key Ingredients

- **Menthol** provides a cooling sensation, as well as aromatherapy benefits.
- **Camphor bark oil** has a cooling, penetrating, and lasting aroma. The cooling and penetrating effects of camphor oil help make it a sedative agent. It also helps relax the body and mind, while giving feelings of peace and freshness. It also works as a detoxifier and a stimulant when applied topically.
- **Eucalyptus** is often used for aromatherapy treatments. It can provide stimulating benefits for the skin.
- **Peppermint oil** is known for its refreshing and cooling properties and can have a calming effect on the skin.

**DIRECTIONS:** After cleansing and soaking skin, apply generously and massage vigorously up and down calves, behind the knees, and feet. Wash hands after use.

**INGREDIENTS:** Water, dimethicone, *Cinnamomum camphora* (camphor) bark oil, menthol, PEG-40 hydrogenated castor oil, decyl glucoside, polyacrylamide, *Eucalyptus globulus* leaf oil, *Mentha piperita* (peppermint) oil, *Citrus grandis* (grapefruit) seed extract, glycerin, carbomer, aminomethyl propanol, C13-14 isoparaffin, laureth-7, tetrasodium EDTA, and phenoxyethanol.
