4LIFE MANUFACTURING FACILITY

THE IMMUNE SYSTEM COMPANY™

In 1998, Founders David and Bianca Lisonbee embarked on a journey to bring phenomenal 4Life Transfer Factor® products to the world. Unlike common supplements you find in health food stores, transfer factors aren't vitamins, minerals, or herbs. Instead, they're tiny messenger molecules composed of amino acids, that help health.

The introduction of 4Life Transfer Factor opened the door for further research, patented techniques, and a new category of wellness products that support health in a different way. Our in-house Research and Development team and Health Sciences Advisory Board (HSAB), comprised of nutritionists and medical professionals, continually raise the standard for modern-day supplementation and ensure the cutting-edge quality of our products.

Because of our deep commitment to quality, excellence, and scientific innovation, we certify every 4Life Transfer Factor® product we sell. In our state-of-the-art quality control lab, we conduct hundreds of tests on each product to ensure its **identity, purity, strength, and composition**.

Many products undergo additional, rigorous quality-assurance tests before being released for distribution. Our products are the foundation and heart of our business. We strive to create products that meet and exceed the highest standards, so you can feel confident incorporating them into your health routine and sharing them with your friends and loved ones.

Pada tahun 1998, Pengasas David dan Bianca Lisonbee telah memulakan perjalanan untuk membawa produk 4Life Transfer Factor® yang luar biasa ke seluruh dunia. Tidak seperti makanan tambahan biasa yang anda dapati di kedai makanan kesihatan, transfer factor bukan vitamin, mineral, atau herba. Sebaliknya, ia adalah molekul penghantar kecil yang terdiri daripada asid amino yang membantu kesihatan.

Pengenalan 4Life Transfer Factor membuka pintu kepada kajian lanjutan, teknik berpaten dan kategori baharu dalam produk kesejahteraan yang menyokong kesihatan dengan cara yang berbeza. Pasukan Penyelidikan dan Pembangunan Dalaman dan Lembaga Penasihat Sains Kesihatan (HSAB) kami, terdiri daripada pakar nutrisi dan pakar perubatan yang terus meningkatkan piawaian untuk makanan tambahan moden dan memastikan kecanggihan kualiti produk kami.

*Disebabkan komitmen kami yang mendalam terhadap kualiti, keunggulan dan inovasi saintifik, kami mengesahkan setiap produk 4Life Transfer Factor® yang kami jual. Di makmal kawalan kualiti canggih kami, kami melakukan ratusan ujian pada setiap produk untuk memastikan **identiti, ketulenan, kekuatan, dan komposisinya**.*

Banyak produk menjalani ujian jaminan kualiti tambahan yang ketat sebelum dikeluarkan untuk diedarkan. Produk kami adalah asas dan nadi perniagaan kami. Kami berusaha untuk mencipta produk yang memenuhi dan melebihi piawai tertinggi, supaya anda boleh rasa yakin menggunakannya dalam rutin kesihatan anda dan berkongsi dengan rakan-rakan dan orang tersayang anda.

4LIFE TRANSFER FACTOR™

IMMUNE SCIENCE INNOVATION

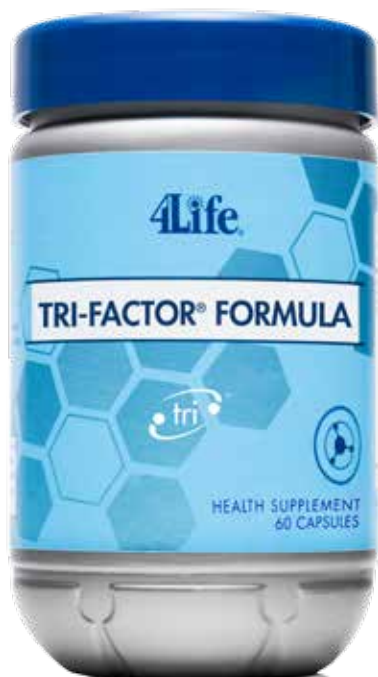

When you feel healthy, you can live your best possible life. You need a smart and vigilant immune system to help you fight back against the threats you face each day. That's why millions of people around the world have chosen to take 4Life Transfer Factor products.

The 4Life® commitment to transfer factor research and optimal immune system function has progressively raised the standard for modern-day immune system supplementation.

Apabila anda berasa sihat, anda boleh menikmati kehidupan anda dengan sebaik mungkin. Anda memerlukan sistem imun yang bijak dan sentiasa berwaspada untuk membantu anda melawan ancaman yang anda hadapi setiap hari. Inilah sebabnya berjuta-juta orang di seluruh dunia memilih produk 4Life Transfer Factor.

Komitmen 4Life® dalam penyelidikan transfer factor dan fungsi sistem imun yang optimum terus meningkatkan standard makanan tambahan sistem imun yang moden.

Did You Know?

Omega-3 and Omega-6 fatty acids are considered **essential fatty acids**. They have a crucial role in body function, as well as normal growth and development, but the body can't make them. You have to get them through foods such as oily fish and seafood, leafy vegetables, seeds, nuts, grains and vegetable oils.

Tahukah Anda?

Asid lemak Omega-3 dan Omega-6 merupakan **asid lemak perlu**. Asid lemak perlu ini mempunyai peranan penting dalam fungsi badan, serta pertumbuhan dan perkembangan yang normal; yang mana tubuh badan tidak dapat menghasilkannya. Anda perlu mendapatkan asid lemak perlu ini daripada makanan seperti minyak ikan dan makanan laut, sayur-sayuran berdaun, biji benih, kacang, bijian dan minyak sayur-sayuran.

4LIFE® PROBIOTICS

Contains a proprietary blend of five active probiotic strains to provide a wide range of probiotic support. Probiotics are among the trillions of live microbial organisms that are naturally present in your body. Also known as “friendly” or “good” bacteria, they are a key component of the body’s health system.

- Probiotics help to maintain intestinal wellness by promoting digestive function and nutrient absorption, as well as regular bowel function and health.
- 5 active probiotic strains-lactobacillus acidophilus, lactobacillus rhamnosus, bifidobacterium lactis, bifidobacterium longum and streptococcus thermophilus help maintain healthy levels of ‘good’ bacteria in the gut.
- Qualified manufacturing techniques ensure each capsule contains 10 billion live bacteria at time of manufacture.
- Does not require refrigeration.
- IFANCA Halal certified.

Did You Know?

The adult human gut contains over 100 trillion bacteria. In a healthy gut, only a small percentage of the bacteria present are harmful. The ‘good’ bacteria or probiotic help maintain intestinal wellness by promoting digestive function and nutrient absorption, as well as regular bowel function and health. Diet, lifestyle, antibiotics, stress and other factors can offset this balance and lead to digestive and health issues.

Tahukah Anda?

Usus orang dewasa mengandungi lebih daripada 100 trilion bakteria. Dalam usus yang sihat, hanya peratusan kecil bakteria adalah berbahaya. Bacteria ‘baik’ atau probiotik membantu memelihara kesihatan usus dengan menggalakkan fungsi pencernaan dan penyerapan nutrien, serta fungsi dan kesihatan usus yang normal. Diet, gaya hidup, antibiotik, tekanan dan faktor-faktor lain boleh mengganggu keseimbangan ini dan mengakibatkan masalah pencernaan dan kesihatan.

Did You Know?

The colon (also known as the large intestine) is the last stop in our foods' journey through the digestive tract. Its main function is to absorb fluid from indigestible food residue and produce solid waste for elimination. But a healthy colon is also important for overall good health. The colon is important for fluid, electrolytes and fatty-acid absorption, and is also home to a large number of commensal bacteria ['good bacteria'], which may hold many benefits for the body. Regular bowel movements without pain, bloating, diarrhoea or bleeding are likely signs of a healthy colon.

Tahukah Anda?

Kolon (juga dikenali sebagai usus besar) adalah perhentian terakhir dalam perjalanan makanan kita melalui saluran penghadaman. Fungsi utamanya adalah untuk menyerap cecair dari sisa makanan yang tidak dicerna dan menghasilkan sisa pepejal untuk penyingkiran. Kolon yang sihat juga penting untuk kesihatan keseluruhan yang baik. Kolon adalah penting untuk penyerapan cecair, elektrolit dan asid lemak. Ia juga rumah kepada sebilangan besar bakteria komensal ['bakteria baik'], yang memberi banyak manfaat kepada tubuh badan. Pembuangan sisa usus tanpa rasa sakit, kembung, cirit-birit atau pendarahan merupakan tanda-tanda kolon yang sihat.

Did You Know?

Buckthorn bark is recognised traditionally in its native Europe, Western and Northern Asia, for its digestive tonic and laxative properties. Likewise, **astragalus** and **green tea**, which contain antioxidants, have been used in Traditional Chinese Medicine (TCM) for thousands of years, often combined with other herbs to strengthen the body.

Tahukah Anda?

Penggunaan kulit **buckthorn** secara tradisional sebagai tonik pencernaan dan bahan laksatif diiktiraf di negara-negara aslinya di Eropah, Asia Barat dan Asia Utara. Begitu juga dengan **astragalus** dan **teh hijau**, yang mengandungi antioksidan telah digunakan dalam Perubatan Tradisional Cina (TCM) untuk beribu-ribu tahun dan sering digabungkan dengan herba lain untuk menguatkan tubuh badan.

Did You Know?

As one of the body's most essential organs, the liver helps remove toxins from blood along with other vital functions, including the production of enzymes and bile that aid in the digestion of food and energy storage to fuel muscles. A healthy diet and nutritional supplementation can help protect the liver from oxidative stress and potentially harmful substances, and keep it functioning optimally.

Tahukah Anda?

Sebagai salah satu organ yang paling penting dalam badan, hati membantu menyingkir toksin dalam darah di samping mempunyai fungsi penting yang lain, termasuk penghasilan enzim dan hempedu yang membantu mencerna makanan dan menyimpan tenaga untuk digunakan oleh otot. Diet yang sihat dan suplemen makanan boleh membantu melindungi hati dari stres oksidatif dan bahan-bahan yang berbahaya, dan memastikan ia berfungsi secara optimum.
