4LIFE MANUFACTURING FACILITY

THE IMMUNE SYSTEM COMPANY™

In 1998, Founders David and Bianca Lisonbee embarked on a journey to bring phenomenal 4Life Transfer Factor® products to the world. Unlike common supplements you find in health food stores, transfer factors aren't vitamins, minerals, or herbs. Instead, they're peptides that transfer immune memory and knowledge from one entity to another.*

The introduction of 4Life Transfer Factor opened the door for further research, patented techniques, and a new category of immune system products that support health in a different way—by the immune system, for the immune system. Our in-house Research and Development team and Health Sciences Advisory Board (HSAB), comprised of nutritionists and medical professionals, continually raise the standard for modern-day immune system supplementation and ensure the cutting-edge quality of our products.*

Because of our deep commitment to quality, excellence, and scientific innovation, we certify every 4Life Transfer Factor product we sell. In our state-of-the-art, million-dollar testing lab, we conduct 20 tests per product to ensure **identity, purity, strength, and composition.**

Many products undergo additional, rigorous quality-assurance tests before being released for distribution.

Our products are the foundation and heart of our business. We strive to create products that meet and exceed the highest standards, so you can feel confident incorporating them into your health routine and sharing them with your friends and loved ones.
