

4LIFE TRANSFER FACTOR® CARDIO

To support a healthy cardiovascular system

Innovative cardiovascular system support

Take Aim

The cardiovascular system encompasses the heart, arteries, and veins that supply oxygen to vital areas of the body like the brain, the heart, and other vital organs. In addition to traditional factors that affect cardiovascular health, healthy homocysteine levels are important.

Because of the obvious need for cardiovascular support, 4Life has developed a revolutionary product to help you take aim at increased health for your heart — 4Life Transfer Factor Cardio. Its formulation begins with the unique and scientifically advanced power of Targeted Transfer Factor™.

Independent studies have already demonstrated the superior immune system support of 4Life Transfer Factor® educate your immune system and support healthy immune responses, the body's ability to remember past health threats. Now, 4Life has identified a way to focus the power of transfer factors to directly benefit the cardiovascular system. Targeted Transfer Factor™ supports your body's immune response as it relates to

cardiovascular system function. As one of the most innovative products of its time, 4Life Transfer Factor Cardio provides one of the best nutritional support in the health industry today.

4Life Transfer Factor Cardio provides comprehensive support for the cardiovascular system. In addition to providing targeted immune and antioxidant support, it also supports healthy cholesterol levels and blood vessel health — all necessary for healthy cardiac function.

Did you know?

4Life Transfer Factor Cardio supports the health and integrity of the entire cardiovascular system.

PRIMARY BENEFITS

- Harnesses the immune system support of transfer factors sourced from egg yolk to directly support the cardiovascular system
- Supports healthy cholesterol
- Promotes healthy homocysteine levels

*These statements have not been evaluated by FSSAI. This product is not intended to diagnose, treat, cure, or prevent disease.

Key Points

- **Supports Healthy Immune response:** Transfer factors are tiny molecules that transfer immunity information from one entity to another. These molecules support healthy immune responses, including the body's ability to remember past health threats.
- **Targeted Transfer Factor™:** 4Life Transfer Factor Cardio features Targeted Transfer Factor technology to support healthy heart and cardiovascular function.
- An exclusive patent (US Patent 6,468,534) for obtaining transfer factors from egg yolk backs this revolutionary product. This broad and basic patent facilitates the continued formulation of 4Life Transfer Factor products that provide targeted nutritional support. Additionally, this patent protects 4Life's exclusivity within the transfer factor market and secures our opportunity for expanded patents with future development.

4LIFE TRANSFER FACTOR® CARDIO
