

4LIFE TRANSFER FACTOR® BELLE VIE™

To promote a healthy and beautiful life

Cellular health support for women

A Beautiful Life

You are a woman. And you're living a great life. Now is your time to take action, and do everything possible to take care of yourself and support your body's health, so that the best years of your life will remain ahead of you.

Every day, more information is made available regarding women's health. Breast and gynecologic health are two issues that stand out, affecting every woman's life in some way.

Vida hermosa, bonita vida, belle vie—no matter what language you use, 4Life Transfer Factor Belle Vie is a product designed to support a long and healthy, beautiful life for women around the world. Scientifically formulated to promote cellular health in women, 4Life Transfer Factor Belle Vie offers targeted support that goes beyond the ordinary. It combines immune-supporting Targeted Transfer Factor™ with a blend of herbal antioxidants & phytoestrogens to support gynecologic system and breast health by assisting the body in the healthy elimination of toxins. Belle Vie provides a powerful natural approach that reinforces your proactive strategy for health and longevity.

Key Points

- 4Life Transfer Factor Belle Vie focuses the immune-supporting benefits of transfer factors to provide targeted health support to the breasts and gynecologic systems of the body. It offers advanced support to help strengthen the body's natural immune response and promote healthy cell growth and function. Belle Vie is formulated with 4Life's exclusive Targeted Transfer Factor, a synergistic blend of transfer factors from both cow colostrum and egg yolk, for the most advanced transfer factor immune support available today.
- Phytoestrogen Support Herbs : Phytoestrogens, or plant estrogens, are trace substances found in food, which mimic and supplement actions of the hormone estrogen. They are known to have and help maintain healthy hormone balance in the body. Ensuring uncompromised support, Belle Vie is formulated with lignans and isoflavones from kudzu and red clover, all powerful phytoestrogens.
- Antioxidant Support: Exclusive Belle Vie also contains a specialized combination of herbal antioxidants, including green tea and grape seed extract to provide antioxidant support and promote healthy cellular growth.
- Shatavari acts as a rejuvenative herb for women.

Technical Points

- The extraction processes for transfer factors and combination process for transfer factors from cow colostrum and chicken egg yolk are protected by US patent 6,468,534 and 6,866,868.
- The gynecologic system includes the uterus, ovaries, endometrium, cervix, vulva, and vagina.

PRIMARY BENEFITS

- Comprehensive cellular support for women
- Provides targeted health support to the breasts and gynecologic system
- Promotes long-term reproductive health
- Provides antioxidant support
