

4LIFE TRANSFER FACTOR[®] TRI-FACTOR[®] FORMULA

For immune system support

The Superpower of Immune Support

A healthy life requires a healthy immune system. There's no getting around that. Modern-day science continues to reinforce the essential function of this amazing protection system and the importance of supporting and maintaining immune system health.

4Life Transfer Factor Tri-Factor Formula brings together 4Life Transfer Factor and the intuition of Nanofactor[™] to extract to more effectively recognize, respond to, and remember potential health threats.

4Life Transfer Factor Tri-Factor Formula contains ingredients made by the immune system, for the immune system. It represents a revolutionary advancement in immune system science and dramatically raises the bar on the standard of support for immune system health.

Technical Points

- Natural Killer (NK) cells are important immune cells that seek and destroy harmful cells through direct contact. When invaders enter your body, NK cells are on the front lines of your immune defense.
- The extraction process for transfer factors from egg sources is protected by U.S. patent 6,468,534, and the combining process for transfer factors from cow colostrum and egg yolk is protected by U.S. patent 6,866,868.

Key Points

- **4Life Transfer Factor[®]**: Transfer factors are molecules found within the bodies of all mammals and birds. Transfer factors promote the immune system's ability to recognize, respond to, and remember invaders seeking to threaten health. Through a patented process exclusive to 4Life, transfer factors from cow colostrum and chicken egg yolk are combined to produce synergistic immune system support.

PRIMARY BENEFITS

- Promotes the health of all your body's systems
- Supports for optimal energy levels
- Provides a proactive strategy to maintain your health

- **NanoFactor™ extract:** Nanofractions are low-weight molecules found in the immune systems of certain mammals and birds. NanoFactor helps regulate immune cell reaction by supporting communication between cells, promoting stability and balance within the immune system, and prompting your body's natural ability to stay on a healthy course.
- **Scientifically Studied:** 4Life Transfer Factor Tri-Factor Formula was developed by 4Life researchers and scientists. Results of an independent study conducted at the Russian Academy of Medical Science conclusively showed that 4Life Transfer Factor Tri-Factor Formula propelled Natural Killer (NK) cell activity to a remarkable 283% above normal immune system response*.

PROPRIETARY AYURVEDIC MEDICINE

Net Quantity: 60 Capsules

Did you know?

DISCOVERY

- Dr. H. Sherwood Lawrence discovered transfer factor molecules in 1949.
- 4Life Founder and Chairman of the Board David Lisonbee learned about transfer factors as part of his own personal health research.
- 4Life secured patents (U.S. 6,866,868 and U.S. 7,815,943) that protect the process and use of transfer factors derived from colostrum ("first milk") and chicken egg yolks.

DESCRIPTION

- Transfer factors and nanofraction molecules can be shared safely and effectively. Whether they are transferred from cow to human or from chicken to human, these molecules are not species specific.
- Transfer factors are tiny messenger molecules composed of amino acids. They are a unique category of bioactive peptides, that transfer immune memory from an experienced immune system "donor" to a less experienced "recipient" immune system.*

BENEFITS

- Transfer factors support the immune system's natural ability to recognize, respond to, and remember potential threats.*
- Transfer factors may boost or balance the immune system response to a potential threat.*
- 4Life Transfer Factor® Tri-Factor® Formula promotes healthy T-cell and B-cell function.* (See page 5 for more information.)

* Test results obtained from an independent NK cell study conducted by Dr. Anatoli Vorobieiev, head of Immunology, of the Russian Academy of Medical Science. The blind study tested Transfer Factor E-XF™ (the primary ingredient in 4Life Transfer Factor® Tri-Factor® Formula).
