## WELCOME TO 4LIFE®

More than a decade ago, we came across the remarkable scientific finding of transfer factors. After experiencing the support of these information-packed molecules ourselves, our passion grew, and we knew we would spend the rest of our lives sharing it with others. Today, with the help of our outstanding research and development team, along with input from our distinguished

Health Sciences Advisory Board, our original finding has developed into one of the most revolutionary supplements available today, 4Life Transfer Factor®. Our progress has solidified 4Life worldwide and served as the springboard for Transfer Factor™ Science.

No matter what your age, or where you're from, we have a safe and effective transfer factor product that's just right for you. We invite you to try 4Life Transfer Factor for yourself and feel the difference that it can have on your personal health. Complemented by a wide range of additional supplements to meet your personal skin care, health care, oral care, and even animal care needs, we are confident that 4Life products will make overall wellness support something you'll look forward to every day.

Sincerely,  
  
 David and Bianca Lisonbee  
 4Life Founders

## What are Transfer Factors?

Transfer factors are molecules in cow colostrum and chicken egg yolk which reinforce general wellness. One simple way to understand this is realizing that mother's milk, apart from nutrients, contains a large amount of transfer factors which ensure the wellness of newborn babies.

### Discovery: Dr. Lawrence and David Lisonbee

- These molecules were discovered in 1949 by Dr. Sherwood Lawrence, a prominent New York University scientist, and it was him who named them transfer factors. He dedicated decades of his life to research into his great discovery.
- David Lisonbee, in his continual personal research into wellness, learnt about the importance of transfer factors and the work carried out by Dr. Sherwood Lawrence.

### Bringing Transfer Factor to the World: 4Life® is Born

What started out as a simple desire to help improve his own health and that of his family quickly became a search for a way to give people all around the world an optimal life.

In over more than twenty years of research into food supplements, David Lisonbee realized that the immune system was the key to boosting the whole body's wellness. Whilst others searched for exotic fruits in remote corners of the world to discover the key, David looked within the human body: what he found led to a wellness revolution.

David and Bianca Lisonbee, convinced of the importance of transfer factors in people's wellness, created 4Life Research in 1998: a company dedicated to the wellness of people and which does three things better than anybody: Science, Success and Service.

**David Lisonbee**, Founder of 4Life Research™

## Our Pillars

4Life® Builds Lives through Success, Science and Service taking Transfer Factor to the world to promote the welfare of people.

### Science

4Life promotes wellness and higher quality of life thanks to the revolutionary boost to wellness offered by the whole range of 4Life Transfer Factor products.

### Success

4Life offers an unmatched opportunity to help people to achieve their goals and financial freedom through the 4Life Opportunity and the Life Rewards Plan™.

### Service

4Life strives to build lives, families and communities around the world through the humanitarian work of Foundation 4Life.

## Our Formulas

As a result of research, 4Life has developed different formulae to adapt to the wellness needs of each individual.

### Transfer Factor XF

Transfer Factors found in cow colostrum.

### Targeted Transfer Factor

Transfer Factors formulated for specific wellness.

### Transfer Factor E-XF

Transfer Factors found in cow colostrum combined with transfer factor found in egg yolk.

### Tri-Factor Formula

A Formula that enhances the function of Transfer Factor E-XF with other molecules from cow colostrums.

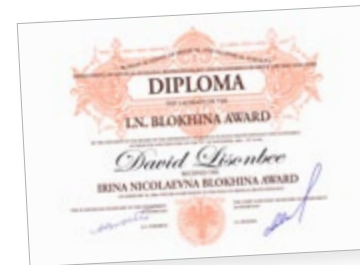

**From left to right:** David and Bianca Lisonbee, Founders of 4Life; Steve Tew, President of 4Life; Dr. Emma Oganova, President, Eurasia; Dr. Calvin McCausland, 4Life Chief Scientific Officer; Dr. Brent Vaughan, Director, Health Information systems.

## Recognition

4Life Transfer Factor® products work and have been making news for more than a decade.

### I.N. Blokhina Award

This prize is usually awarded to university professors, biologists and biochemists. In 2006 David Lisonbee won this prize in recognition of his commitment to research into transfer factors, patents and innovative production processes.

### Inc. magazine

4Life was placed 15th in the list of private companies with largest growth in the United States.

### TotalHealth magazine

4Life was recognized for its dedication to wellness by this prestigious magazine, a publication recognized for its in depth content on personal wellness.

### \$100 Million Club

In 2010 4Life entered this club on becoming a direct selling company with annual sales of more than \$100 million.

### Nexera

A principios del año 2012, Nexera, la principal empresa proveedora de capacitación y material educativo para la industria del Marketing Multinivel, anunció la lista de las 25 mejores compañías de Marketing Multinivel ubicando a 4Life en el puesto número 10.

### Success from Home magazine

We have been endorsed by independent organizations in leading publications, such as Success from Home, which promotes credibility and so inspires confidence in the future success and stability of 4Life.

## TRI-FACTOR FAMILY

The exclusive 4Life Tri-Factor Formula is a breakthrough in the wellbeing industry. The Tri-Factor Family products are specially formulated to give broad support to your wellbeing.

\* 4Life products are not intended to diagnose, treat, cure, or prevent any diseases.

### 4LIFE TRANSFER FACTOR® PLUS® TRI-FACTOR™ FORMULA (90 CAPSULES)
