TOGETHER, BUILDING PEOPLE®

Science at its best

At 4Life, we've dedicated more than 15 years to researching and developing innovative 4Life Transfer Factor products—and our commitment has paid off. Transfer factors aren't simply nutrients; they provide knowledge to your body's immune system—supporting its natural ability to know what to do when challenged with health threats.*

Further advancing our position as a world leader in Transference Science, 4Life is set apart by our in-house Research and Development team, as well as the supporting expertise of a professional board of medical professionals, immunologists, nutritionists, and researchers, known as the Health Sciences Advisory Board (HSAB). Each of our scientific leaders is dedicated to the continued advancement of Transference Science because of the positive impact we continue to see in people's lives.

WELCOME TO 4LIFE®

More than 15 years ago, we came across the remarkable scientific finding of transfer factors. After experiencing the energizing immune system support of these information-packed molecules for ourselves, our passion grew, and we knew we would spend the rest of our lives sharing 4Life Transfer Factor® with others.* Today, with the help of our outstanding Research and Development team, along with input from our distinguished Health Sciences Advisory Board, our original product has developed into one of the most revolutionary immune system support ingredients available, 4Life Transfer Factor.* Our progress has solidified 4Life as *the Immune System Company* worldwide and served as the springboard for Transference® Science.*

No matter your age, or where you're from, we have a Certified 4Life Transfer Factor product that's just right for you. We invite you to try 4Life Transfer Factor for yourself and feel the difference that *immune education* can have on your personal health.* Complemented by a wide range of additional supplements to meet your personal skin care, general wellness care, oral care, and even animal care needs, we are confident that 4Life products will make immune system and overall wellness support something you'll look forward to every day.*

Sincerely,

David and Bianca Lisonbee

DID YOU KNOW? 4LIFE TRANSFER FACTOR®

DISCOVERY

- Dr. H. Sherwood Lawrence discovered transfer factor molecules in 1949.
- 4Life Founder and Chairman of the Board David Lisonbee learned about transfer factors as part of his on-going personal health research.
- 4Life secured patents (U.S.# 6,866,868 and U.S.# 7,815,943) that protect the process and use of transfer factors derived from colostrum ("first milk") and chicken egg yolks.

DESCRIPTION

- Transfer factors are tiny messenger molecules composed of amino acids (i.e., transfer factors are a unique category of bioactive peptide), that transfer immune memory from an experienced immune system "donor" to a less experienced recipient immune system.*

BENEFITS

- Transfer factors support the immune system's natural ability to recognize, respond to, and remember potential threats.*
- Transfer factors may boost or balance the immune system response to a potential threat.*
- 4Life® Transfer Factor Plus® Tri-Factor® Formula has been shown to increase Natural Killer (NK) cell activity by up to 437%.*†
- 4Life Transfer Factor Tri-Factor Formula promotes healthy T-cell and B-cell function.*
