

4Life Transfer Factor®

Educate Your Immune System

TOGETHER, BUILDING PEOPLE®

EDUCATE YOUR IMMUNE SYSTEM

Getting an education is an important part of being successful in life—you send your children to school to give them the best possible chance to succeed.

When you supplement your healthy lifestyle with 4Life Transfer Factor® products, you're giving your immune system the support it needs to function optimally.

4Life Transfer Factor products educate your immune system to:

1. **Recognize** invading germs and other potential threats
2. **Respond** more efficiently after a threat has been identified
3. **Remember** how to act the next time a problem is encountered

THE SMART CHOICE FOR GOOD HEALTH

What does living your best life mean to you? Is it enjoying good health? Achieving your goals? Spending quality time with family and friends?

When you feel your best, you can live your fullest life—however you define it. Feeling great starts with a healthy immune system. Your immune system plays an important role in your health by helping your body fight off and recover from infections and other trauma caused by the environment and stresses of life.

HOW 4LIFE TRANSFER FACTOR® PRODUCTS EDUCATE YOUR IMMUNE SYSTEM

Immune system education starts with a mother and a nursing baby. When babies are first born, they have underdeveloped immune systems. When a baby is fed colostrum or “mother’s first milk,” the mother transfers immune knowledge to her baby. This is called “passive immunity” because the mother is “passing” or “transferring” her immunity to her child. The passive immunity helps educate the baby’s inexperienced immune system.

Colostrum is especially rich in proteins that can be transferred from one immune system to another—and from one mammal to another. One of the proteins discovered in colostrum is called transfer factor. 4Life Transfer Factor is sourced from cow colostrum and chicken egg yolks. Through innovation, 4Life harnesses the transfer factor proteins from these sources to create a product that offers continuing immune system education for you and your family.

4Life Transfer Factor® Tri-Factor® Formula Increases Natural Killer (NK) Cell Activity

Test results obtained from an independent, unpublished in vitro experiment conducted within the Blokhin Cancer Research Center, at the Russian Academy of Medical Sciences, in Kashirskoe Shosse, Russia. The randomized and controlled in vitro study assessed the effects of 4Life Transfer Factor® Classic, 4Life Transfer Factor® Tri-Factor® Formula, or 4Life® Transfer Factor Plus® Tri-Factor® Formula, versus a positive control (Interleukin-2, or IL2) on NK cell activity and effectiveness in destroying damaging cells. Blood was collected from healthy volunteers and then incubated for up to 48 hours. [REFERENCE: Kisilevsky MV & Khalurina EO. Antitumor and cytotoxic activity of mononuclear blood cells. Unpublished observations]

SMART CHOICES FOR YOUR IMMUNE SYSTEM

Supporting your immune system and experiencing optimal health are important components of living a full life. When your body isn't functioning at its best, it stops you from being able to enjoy the world around you. 4Life offers a variety of ways for you and your family to get your daily serving of 4Life Transfer Factor® immune system support.

SMART RESEARCH FOR SMART PRODUCTS

4Life® is committed to ongoing research in immune system support. The company works continually to guarantee product safety and efficacy through academic associations, scientific publications, and exploratory research.

4Life's partnership with the Molecular and Applied Sciences Laboratory (MASL), part of the School of Kinesiology in Auburn University's College of Education, reinforces our commitment to further exploration on topics such as immunology and muscle and fat tissue physiology.

CERTIFIED AND GUARANTEED

When you purchase a 4Life product, you can be assured that you are getting the very best in immune system support. Every 4Life Transfer Factor® product includes our commitment to quality in the areas of identity, purity, strength, and composition.

4Life has invested over a million dollars in state-of-the-art laboratory equipment to create one of the most advanced analytical and quality labs in the health supplement industry—similar to what you would find in pharmaceutical labs. In fact, 4Life performs no less than 20 analytical tests before releasing a product for distribution. These tests ensure that each product meets 4Life's strict specifications for product quality.

“We will continue to be at the forefront of discovery as expressed by our investment in patents, exploratory research, academic associations, and publications, and with the expertise of our Health Sciences Advisory Board and in-house Research and Development team.”
